

METEO SUN SHIELDS

- 4 METEO shield TOP
- 3 sun shield TOP
- (2 METEO shield BOT) not included
- 1 security ring

QUICK GUIDE

STEP 1

First, put on the security ring (no.1). Make sure the arrows are pointing upwards.

(STEP 2)

(Next, put on the plain shield (no.2) with no attachments.)

*Please note that following additional testing, plain shield no.2 was found unnecessary and is no longer included in orders by default. Nevertheless, should you wish to purchase it, you may contact us at tomst@tomst.com.

STEP 3

Then put on the shield with the centre leg attachments (no.3) and make sure it fits securely.

(STEP 4)

(After that, secure the second shield onto the third shield's leg attachments.)

STEP 5

Then push the security ring upwards. The leg attachments will fit into the divets of the security ring.

STEP 6

Lastly, attach shield no.4. You should hear a nice click. And you're done!

To take the sun shield off, simply reverse the process, starting with removing the security ring.
