Graphtec Distributor Information Bulletin

Specification change of built-in memory in GL840 & GL240

Thank you very much for your support to GRAPHTEC products.

We would like to announce that the specification of the storage device in the GL840 and GL240 will be changed.

The current model has two slots for SD card, one on the right side(Slot 1) and another one on the top right side(Slot 2). With this specification change, the slot 1 will be covered and SD memory card will be built in the logger. There will be no change with the slot 2.

SD card slot 2
For the SDHC memory card or WLAN unit (B-568)

Current model: SD card slot 1 for the SDHC memory
New model: Slot 1 will be covered. Built-in 4GB Flash memory

Image is the GL240. The GL840 is also the same.

This specification change of the SD slot is to accommodate the requirements for enhancing data security as capturing data without using the removable memory.

The model name and price will not be changed with this specification change.

We will also announce this information on our web site at 1st July, 2016.

Please refer to the following page for more detail.

Availability of new GL840 and GL240

The device with following serial number is manufactured with new specification.

GL840

Model number	Destination	Serial number
GL840-M C	China	C6041xxxx or later
GL840-M E	Europe, Asia	C6041xxxx or later
GL840-M K	Korea	C6051xxxx or later
GL840-M U	America	C6051xxxx or later
GL840-WV C	China	C6052xxxx or later
GL840-WV E	Europe, Asia	C6052xxxx or later
GL840-WV K	Korea	C6062xxxx or later
GL840-WV U	America	C6082xxxx or later

GL240

Model number	Destination	Serial number
GL240 C	China	C6053xxxx or later
GL240 E	Europe, Asia	C6043xxxx or later
GL240 K	Korea	C6043xxxx or later
GL240 U	America	C6043xxxx or later

For more details about the shipment schedule of GL840 or GL240, please contact to your sales representative.
