RHTemp80 L

RHTemp80 L is a temperature and humidity data logger from -40°C to 80°C (calibration from 25°C to 80°C), managed with Windows software and USB interface (DiskInterface HS, Multibay). **Battery** is **user replaceable** and the data logger is **provided with an Accredia (NIST equivalent) traceable cetificate** on different points.

It is available the XL model too which has same diameter but is higher because it hosts a bigger battery for a longer life time, along with the model for up to 125°C.

Among the possible applications there are the drying processes monitoring, especially of pasta, of powders and grains storehouses, of extreme environments.
There are also other models of high temperature data loggers, for pressure and temperature only too.

Main features

- Small size
- Completely food grade
- User **replaceable battery** (**software shows battery status**)
- Accredia (NIST equivalent) traceable calibration certificate included
- Available **extended calibration from - 40°C** (order extra calibration points)

Plus

- High accuracy and precision
- Printed reports compliant with health regulations and ISO (data are not editable in the software)
